Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scirica et al 5,733,293 in view of Brewer 4,928,830 (of record).

Scirica shows a package for a needle and suture (Figure 3A), including a base portion 66, cover 68, a needle park, a rail 74 defining a suture race 70, and an aperture 72 for passage of the suture. The cover is retained by tabs 76. However, the cover is completely removable from the base, so it may be lost or misplaced. One would recognize that it would be desirable to attach the cover to the base. For example, Brewer shows that a container for medical equipment may have a base 22, and a cover 24 attached to the base by means of a living hinge 26 (figure 2). This would be desirable in the suture package of Scirica to prevent the cover from being lost. It would have been obvious to one of ordinary skill in the art to attach the base and cover of Scirica by a living hinge, as suggested by Brewer.

Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.
